

The background features a complex, futuristic design with various technical elements. On the left, there is a large circular component resembling a lens or a sensor with concentric rings and a central white circle. To the right, several large, semi-transparent arrows point towards the right, overlaid on a network of white lines and geometric shapes. The overall color palette is dominated by light blues, whites, and greys, with a red accent color used in the text and a red banner at the bottom right.

## Think you know Unipart...?

**The name may be familiar but the evolution of Unipart will surprise you!**

Not only well established but recognised as a major influence in the highly competitive fields of Manufacturing, Logistics and Consultancy Services; the evolution of Unipart and its subsidiary companies has been dramatic, and never more so than in recent years.

Constantly innovating and expanding the business as new and emerging technology develops, Unipart has always maintained its competitive edge by drawing upon some of the brightest and most driven talent to

join our industry centres of excellence plus expertise derived from collaborations with other leading industry specialists like Kautex and Williams Advanced Engineering.

From reimagining supply-chains, through to developing latest battery / EV technology, and of course fully embracing the digital revolution - many of these advancements are helping to transform other businesses with support and knowledge shared through three dedicated Centres of Excellence.

## Unipart Way Philosophy

The Unipart Way is a philosophy of working underpinned by a set of tools and techniques that:

- Form part of our knowledge management system
- We continuously improved based upon our experience
- Enable us to improve faster than the best alternative available to our existing and potential customers

*The Unipart Way is 'efficiency with a human face'*

## Race To Zero

Unipart Group has signed up for the United Nations Race To Zero campaign as part of a commitment to be carbon neutral by 2030 and net carbon zero by 2050.

# Unipart EV battery joint venture Hyperbat wins Lotus contact

Management Briefs - tagged in Business News, electric vehicles, Unipart Manufacturing on 26<sup>th</sup> May 2022

**Hyperbat, Unipart's joint venture with Williams Advanced Engineering, has won a multi-million pound deal with Lotus to supply battery packs for the new all-electric Evija hypercar.**

Starting this June, Hyperbat will produce lithium-ion battery packs for the British carmaker for an initial period of three years. The mid-mounted battery pack will support a target output of 2000 PS and will ensure the Lotus Evija can reach 0-62mph in just three seconds and a top speed of over 200mph.

Situated at the Unipart Manufacturing site in Coventry, Hyperbat's

new state-of-the-art digital facility houses the latest manufacturing technologies integrated together to ensure 'no-fault-forward' quality systems and total traceability. This is designed to support low-volume, high-performance vehicles such as the Lotus Evija.

The joint venture considerably benefits both from R&D facilities next door at the Institute of Advanced Manufacturing and Engineering (AME), which offers on site support in areas like laser welding, metallurgy, and metrology, but from the Unipart Powertrain Applications business, which brings 30 years of Tier 1 manufacturing expertise.

## Benefits and Development

Key to the success and future of Unipart is the ongoing personal as well as career development of all its employees. In addition to the substantial professional training and coaching support already in place, if you're aware of an external course or scheme that can benefit yourself and the company then you have our backing. Examples range from a Mental

First Aid course, to Six Sigma qualification, and even Masters Engineering degree with nothing overlooked.

Additionally, we strive to provide a comprehensive range of benefits that are not only beneficial but desirable including:

- Competitive salary
- Shift allowance for unsociable hours
- Pension and death in service provisions for those enrolled in the scheme
- 25 days holidays (plus Bank Holidays)
- Employee Assistance Programme
- Mental Health First Aiders on site
- Health and Wellbeing Initiatives
- Employee offers and discounts from numerous chosen retailers
- Cycle to work scheme, plus various recognition events and rewards
- Free car parking

# Why choose Coventry?

**Placed in the top 10 cities to live and work, Coventry plus the beautiful county of Warwickshire possess plenty of appeal.**

- Coventry is going places - as the second fastest growing city outside of London, it is rich in heritage, culture (City of Culture 2021), and formerly the capital of England... not just once, but twice!
- The region is home to award-winning Universities, top level sport, concerts, and festivals, plus a vast array of entertainment and dining - drawing upon the city's vast multi-cultural heritage and influence.
- Surrounded by stunning countryside including numerous pretty villages as well as the historic towns of Warwick, Leamington Spa and Stratford upon Avon, you've got the choice of rural bliss or city bustle to suit your lifestyle, and all literally on your doorstep.
- Boasting an enviable infrastructure including excellent transport links and numerous housing options, all combined with a low cost of living compared to many other UK cities... the appeal of Coventry is obvious to many.

## Interested?

**We look for individuals who not only demonstrate the values that shape our business but genuinely wish to make a difference.**

We are committed to providing not just a home for exceptional and committed talent but an environment where you have the support and belief to truly flourish in your career.
