## About Us

**Artemis Technologies is an applied technologies company, formed as a spin-off from the successful America's Cup professional sailing team, Artemis Racing. .**

Firmly established as one of the world's leading maritime design companies, Artemis Technologies provides engineering services to both high-performance and commercial clients, as well as developing unique products, including

the most advanced maritime simulators in the world.

Based in Northern Ireland, Artemis Technologies is combining world class skills in simulation, lightweight structure engineering, electronics, hydraulics, aerodynamics and hydrodynamics, in a groundbreaking project to develop a new class of zero emission vessels.

# Timeline & Key Events

January 2017

Artemis Technologies launched (University of Cambridge campus)

October 2018

Belfast chosen as official home and centre of excellence

November 2018

Launch of full motion platform sailing simulator

June 2020

Awarded £33m grant to develop zero emission ferries

December 2019

JV announced with Denmark's TUCO Marine Group to produce the world's first zero emissions workboat

March 2019

Early stage funding awarded by UKRI Strength In Places Fund

February 2019

Artemis scoops the coveted Sustainability Award for its ASV

September 2020

ATL selected as one of 30 companies to join government initiative Net Zero 1.0

November 2020

ATL wins prestigious Maritime 2050 accolade

January 2021

Artemis eFoil electric propulsion demonstrator announced

## Vision

To lead in the decarbonisation of the maritime industry

## Mission

To become the market leader in high-speed zero emission vessels and propulsion systems

## Values

### Complete sustainability

Named after the Greek goddess 'Artemis', a guardian of nature, protection of our environment drives every facet of our organisation

### Rich heritage

Building on our yachting history, we continue to be a world leader in high-performance green-powered vessels

### Innovation

Through research and collaboration, we pioneer new maritime technologies and products

### Winning performance

Our globally recognised team is committed to delivering excellence for our clients

**A**GILITY: we are flexible, adaptable, quick thinking and can manage change well

**R**ESPECT: we have respect for and care about the environment and the wellbeing of our people

**T**EAMWORK: we are collaborative, co-operative, and supportive of each other

**E**NERGY: we inspire & energise each other, enjoy what we do, have a “can do” positive outlook

**M**INDFULNESS: we each pay attention to/are mindful of our intentions, actions, and attitude

**I**NTEGRITY: we are trustworthy, honest, and reliable

**S**UCCESS: we are committed, persistent, determined, and results driven

## Culture

As a dynamic, high growth, and incredibly innovative company, it may feel at times that we are building the boat as we sail it, but that's because we can!

Fuelled by cutting edge ideas, innovation and technology, it is ultimately our people who drive our success. People who are the best at what they do, and driven by a shared goal, to help change the world for the better.

## Believe In Your Career

<https://youtu.be/uBUK0Io0tFY>

Our team of global experts, with many from the marine, aerospace, and motorsport industries, is led by double Olympic gold medallist yachtsman, Dr Iain Percy OBE.

## The Inside View

**Prof. Mark Gillan**  
**COO & SIP Programme**  
**Director**

Professor Mark Gillan studied Aeronautical Engineering at Queens' University of Belfast, obtaining a First Class Honours Degree in 1990, followed by a Doctorate in Aeronautical Engineering at Queens, in 1993. Throughout his studies he was sponsored by Short Brothers (Bombardier). Mark is both a Fellow of the Royal Aeronautical Society and a Chartered Engineer. Mark has written 37 peer reviewed Journal and Conference papers and worked on a mixture of EPSRC, Innovate UK, UK Sport and EU funded programmes. Following a career at Bombardier and in academia Mark held senior technical management positions in Formula One (F1) at McLaren, Jaguar/Red-Bull, Toyota and most recently as Chief Engineer in charge of the Williams F1 Race Team. Mark was a Director at the US Company MTS Systems, leading their Advanced Technology Group which included their Electric Power Systems and Motorsports Groups and subsequently CEO of the renewable energy firm Wavepower. In 2019 Mark became Chief Technology Officer at Innovate UK, responsible for leading the Strategy and Impact and Centres

and Networks Governance directorates which included the UK's Catapult Network and 4,100 staff. This includes directing delivery of Innovate UK's strategy, the design and development of Innovate UK's programmes, ensuring that the organisation incentivises and drives economic growth through business-led innovation. Mark had direct responsibility for an annual UK Government spend of £0.35Bn. In addition, Mark holds a Visiting Professorship at the University of Surrey since 2011 and another at Ulster University and has been engaged as a BEIS Project reviewer, QinetiQ Fellow panel reviewer, Member of FiA Formula One Technical Working Group, AIAA Technical Committee Member and conference chair, BEIS Aerospace Innovation Network - ex-Motorsport Group Chair, Young Engineer for Britain Judge and Business Education Initiative interviewer and reviewer.

**Kiera McSorley**  
**Financial Controller**

Kiera began her career as an accountant at a leading accountancy practice in Ireland where she trained and earned her chartered accountancy qualification. She worked across both domestic and global financial and accounting departments including a FTSE 100 company before joining Artemis Technologies as Financial Controller

in 2020. Kiera is responsible for overseeing the company budget and forecasts, financial and tax accounting and reporting, as well as ensuring budgetary control and cash management. A key area of her job is organising the distribution of the £33 million UKRI Strength and Places Fund grant, and liaising with consortium partners. The appropriate distribution of funding is essential in creating the best possible environment for our research and innovation to flourish. "With a passion for environmental protection, working with Artemis Technologies is a career I've always longed for without even realising it!".

**Sarah Gundersen**  
**Head of Sail Racing**  
**Services**

For the past 13 years Sarah has been involved in various roles within the high performance sailing industry. Sarah joined Artemis Racing in 2008, and was part of the team that competed in two America's Cup campaigns and several classes on the International circuit, providing her with an excellent technical foundation and broad managerial experience within the maritime industry. Sarah now runs the Sailing Services business for Artemis Technologies.

## Belfast - A Hidden Gem

**Steeped in maritime history, Belfast is a great place not only to visit but one in which to live, work and do business, which is why Artemis Technologies has chosen the city as its home.**

**With the region often referred to as a hidden gem, there are many reasons to make the region your home too:**

**Housing:** With house prices generally lower than the UK plus in plentiful supply (to rent or buy), there is a neighbourhood to suit all tastes. Castlereagh - for families and golfers; Queens Quarter near to the University - more vibrant plus reasonably priced; and also the historic Titanic Quarter - the redeveloped waterfront for lifestyle apartment living.

**Natural wonders:** Stunning scenery and places of interest including the World Heritage Site, Giant's Causeway; the Marble Arch Caves Geopark; Fermanagh Lakelands and the beautiful Mourne Mountains.

**Food & drink:** From Michelin starred restaurants to some of the best fresh produce in the world, along with an array of bars, eateries, breweries and distilleries - you're truly spoilt for choice.

Whatever you enjoy most... golf, watersports, hiking, festivals & parties or just peace & quiet, Northern Ireland and the greater Belfast area really does have it all!

## Interested?

**We look for individuals who not only demonstrate the values that shape our business but genuinely wish to make a difference.**

We are committed to providing not just a home for exceptional and committed talent but an environment where you have the support and belief to truly flourish in your career.
